

Automated Shades

Solutions that put you in control of your light

 **LUTRON**

The transformative power of light

Think about how your mood changes when a drab, cloudy morning turns into a sun-kissed day, and then that bright afternoon sun softens into a dusky evening. You go from feeling lackluster to energized and then relaxed.

Light energizes life.

Light not only changes the look of the day, but also affects the way you feel. Wouldn't it be nice to adjust the amount of daylight in your home to complement your mood and even help transform it?

With Lutron, you have the power to do that. The press of one button can shape the lighting in a space to create the perfect atmosphere for any activity.

The Lutron difference

- Over 20 years of experience and knowledge in the automated shading industry, Lutron is the world leader in precision controlled automated blinds.
- Provides the entire shading solution—the shade itself, electronic drives, controls, power supplies, and hardware—ensuring the highest-quality products and a satisfying customer experience.
- Broadest breadth of line, with eight shade styles and over 1,500 materials and fabrics for any budget or application.
- Exceptional attention to detail for functional—and beautiful—controls, and a wide selection of styles, colors, and finishes.
- Seamless integration of daylight, electric light, security systems, and HVAC systems, for total home control solutions that help save energy.
- Work with best-in-class home solutions to provide ultra-reliable shade (and light) integration with your favorite brands.
- Global 24/7 customer support.

ROLLER SHADES

Roller shades

Sivoia QS roller shades complement both traditional and contemporary designs and are available in different sizes to accommodate the needs of any room. Sivoia QS shades are hard-wired solutions.

Precision control

All Lutron shades feature intelligent hembar alignment, which was designed to synchronize all automated shades in a single room or in an entire home.

Pocket—recessed into the ceiling, pockets offer blackout capability for the window and a protective enclosure for the entire shade system.

Fascia—this decorative cover conceals the roller and is ideal for more conventional spaces as a round or a square profile.

Round

Square

ROLLER SHADES

Battery-powered roller shades

Battery-powered shades are cost-effective, easy to maintain, and ideal for areas that require a wire-free solution.

Battery basics

Triathlon battery-powered roller shades feature industry-leading battery life and use store-bought batteries. The innovative headrail design makes batteries easy to access and change.

Shade sizes

Battery-powered roller shades are available in configurations up to 12' wide by 12' tall.

Fascia options for battery-powered shades

Architectural—provides a clean and contemporary aesthetic for spaces that require a modern finish.

Exposed standard—this slim profile can be hidden with custom top treatments.

Fabric-wrapped—ideal for applications with a more traditional design aesthetic, fabric-wrapped fascia provides a finished look with fabric to match your shades.

Exposed WIDR—this profile can be concealed with a custom top treatment or left uncovered for an industrial aesthetic.

PALLADIOM ROLLER SHADES

Palladiom roller shades

Palladiom roller shades are in a class by themselves. Sleek and sophisticated, they feature exposed bracket hardware designed specifically to be seen. The bracket, together with the roller tube's slender profile and carefully balanced bottom rail, take this distinctly crafted, automated solution to new heights.

Palladiom bottom rail

Designed to fit anywhere

Palladiom shades seamlessly blend into any architectural style. Mount on or above the window frame to highlight the handsome end bracket or tuck Palladiom jamb brackets elegantly inside the frame.

End bracket

Center bracket

Jamb bracket

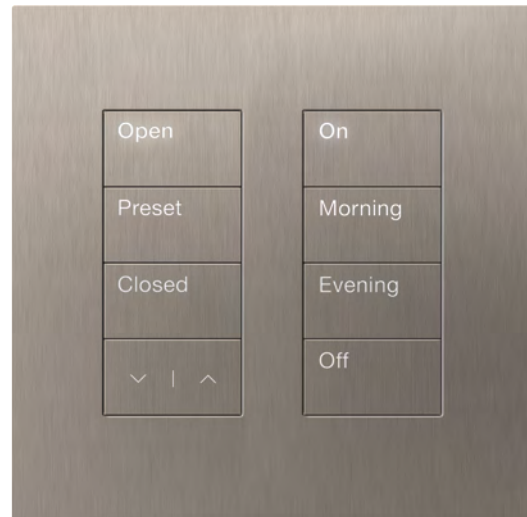

Coordinating Palladiom controls

Block midday glare with one touch of a Palladiom keypad, which complements Palladiom shades and temperature control for a sleek, coordinated aesthetic.

You can also add Lutron lighting control to any Lutron automated shading solution for convenient control of lights as well as shades all from the same control station.

ROLLER SHADE FABRICS

Roller fabric opacity

Sheer

- Open weaves preserve exterior views while protecting furnishings from U/V rays
- Ideal for rooms where you don't need complete privacy

Translucent

- Tighter weaves transform harsh daylight into a soft, filtered glow
- Provides increased privacy for spaces like bathrooms

Room darkening

- Opaque fabrics block light from entering a space
- Ideal for bedrooms and media rooms

Drapery track systems

Drapery track systems electronically operate pinch pleat or ripplefold curtains to provide elegant, quiet, convenient daylight control. You can use your own material for drapery tracks.

Drapery sizes

Lutron drapery track systems provide a wide range of options to suit your needs. Our systems allow for tracks up to 30 feet long, single or multi-bend curved tracks, manual-open override, track splicing, 90° curves, and more.

Draw styles

Right draw—the drive is located on the right-hand side, and the carrier opens drapery from the left toward the right. (Drive remains hidden behind the stack back.)

Left draw—the drive is located on the left-hand side, and the carrier opens drapery from the right toward the left. (Drive remains hidden behind the stack back.)

Center draw—one drive uses two carriers to open the drapery from the center to the left and right simultaneously. (Drive can be located on the left or right, while remaining hidden behind the stack back.)

Straight track

The straight track system is available in the following configurations:

- Single or dual track
- Standard single track with lengths up to 18ft, and up to 30ft spliced

Curved track

Lutron drapery track can be custom-curved to fit a curved wall, bay window, and many other special applications.

- Standard arc: 90° bend with a 20" minimum radius
- Custom arcs are also available, and can accommodate center and single draw

Pleat styles

Pinch pleat—the style is named for the pleated look created by pinched gatherings of the fabric at the top of the drapery. Pins on the back of the drapery are simply looped through the carriers on the track when installed.

Ripplefold—the style is named for the soft, consistent ripples created by the drapery as it hangs from the track. Fullness of the drapery is determined by the carrier spacing. Lutron ripplefold tracks are available in three fullness factors: 80%, 100% and 120%.

Mounting options

Choose from wall or ceiling mount. Tracks can be mounted in a cove (as pictured here) or recessed into the ceiling.

HORIZONTAL SHEER BLINDS

Horizontal sheer blinds

Horizontal sheer blinds pair the soft elegance of a sheer with the precise control of a blind.

Fabric vanes tilt in precise increments between open and closed positions, aligning perfectly across adjacent blinds.

WOOD BLINDS

Wood blinds

Wood blinds are an attractive and effective way to ensure privacy while still allowing sunlight to filter into a space. Only Lutron wood blinds offer independent lift and tilt for precision alignment of both height and angle positions between multiple blinds.

Preset

Open tilt

Closed

WOOD BLINDS

Battery-powered wood blinds

Triathlon battery-powered wood blinds feature advanced technology*. The Natural Light Optimization™ feature in the Lutron App allows blinds to automatically tilt to strategic angles throughout the day based on the sun's position in the sky, allowing the blinds to diffuse direct sunlight and maximize comfortable daylight. Schedules will adjust as the seasons change. These blinds feature a customized bottom rail so you can easily manually lift or lower the blinds when necessary.

Finishes

2" wood slats hand-crafted from genuine North American Basswood available in 12 stained and 6 painted finishes to complement any interior.

Battery basics

Triathlon battery-powered wood blinds feature industry-leading battery life and use store-bought batteries. The innovative headrail design makes batteries easy to access and change.

*Works with Caséta, RA2 Select and HomeWorks systems with QSX processors (Note: Natural Light Optimization is currently only available with Caséta and RA2 Select. Triathlon wood blinds are not compatible with HomeWorks QS or RadioRA 2 systems at this time)

HONEYCOMB SHADES

Battery-powered honeycomb shades

Triathlon battery-powered honeycomb shades are cost-effective, easy to maintain, and ideal for areas that require a wire-free solution.

Honeycomb shades come in varying opacities from sheer and translucent to room darkening, allowing you to achieve the optimal level of light control and privacy for your space. In addition, all insulated honeycomb shade fabrics have a white backing that acts as a reflector, to help keep your space cool and comfortable. With these dual-sided fabrics, you can give each room a signature look while maintaining a uniform appearance from the outside.

Battery basics

Triathlon battery-powered honeycomb shades feature industry-leading battery life and use store-bought batteries. The innovative headrail design makes batteries easy to access and change.

Cable-guided options

Cable-guided honeycomb shades move smoothly and quietly along vertical cables that are mounted to the outside of a door or window frame. These cables prevent shades from swaying, making this solution ideal for doors or areas of heavy airflow.

HONEYCOMB SHADES

Fabric opacity

Sheer**

- Daylight transmits through the fabric
- Fabric also allows views to the outside

Light-filtering*

- Daylight transmits through the fabric
- Fabric limits views to the outside

Room-darkening**

- Completely blocks light through the fabric
- Completely blocks view to the outside

KIRBÉ VERTICAL DRAPERY

Kirbé vertical drapery

An industry first, the Kirbé vertical drapery smoothly pulls fabric up and completely out of the way, unlike traditional drapery that moves from side to side. This unique design provides greater access to views by eliminating stackback.

For floor-to-ceiling glass, the Kirbé can be recessed into the ceiling, leaving the top of the window unobstructed. This drapery can also provide a dramatic way to reveal the screen in a home theater.

Add a decorative cornice for a stylized finish with no need for a recessed pocket.

ROMAN SHADES

Roman shading system

Roman shades give you the advantage of using your own material, while still reaping the benefits of Lutron technology. This style gives you a lot of flexibility not only in fabric options, but also in the number of pleats you want. Work with your local Lutron shade specialist to achieve the ultimate design for your space – from the perfect fabric to the number of pleats.

Precision control

Like the other styles of Lutron shades, Romans feature intelligent hembar alignment, which synchronizes all shades/window coverings in one room or throughout a home.

Custom fabric programs

Customer's Own Material (COM)

Drapery or Roman shading systems

We recognize the unique nature of your projects and the need to match or coordinate window treatments with existing furnishings. This service allows you to select materials outside of our standard offering, giving you the freedom to create your own design while still providing reliable Lutron motorization.*

Custom printing

Traditional or Kirbé drapery and roller shades

Give your space a personal touch by reproducing a favorite painting or custom design on a Lutron approved fabric. You can choose to supply your own design or can use one of our pre-designed patterns below. In just three easy steps you can select your print, email your request, and then approve your proof and place your order.*
